

Story Board

Learning path recommendation application

Ohh!! the deadline is
tomorrow!!
I don't know which
courses to take!!
What to do??!!

I will ask Priya. But will that
really work for me ? She is a
working professional in the it
field.

May be I should ask in the
whatsapp community

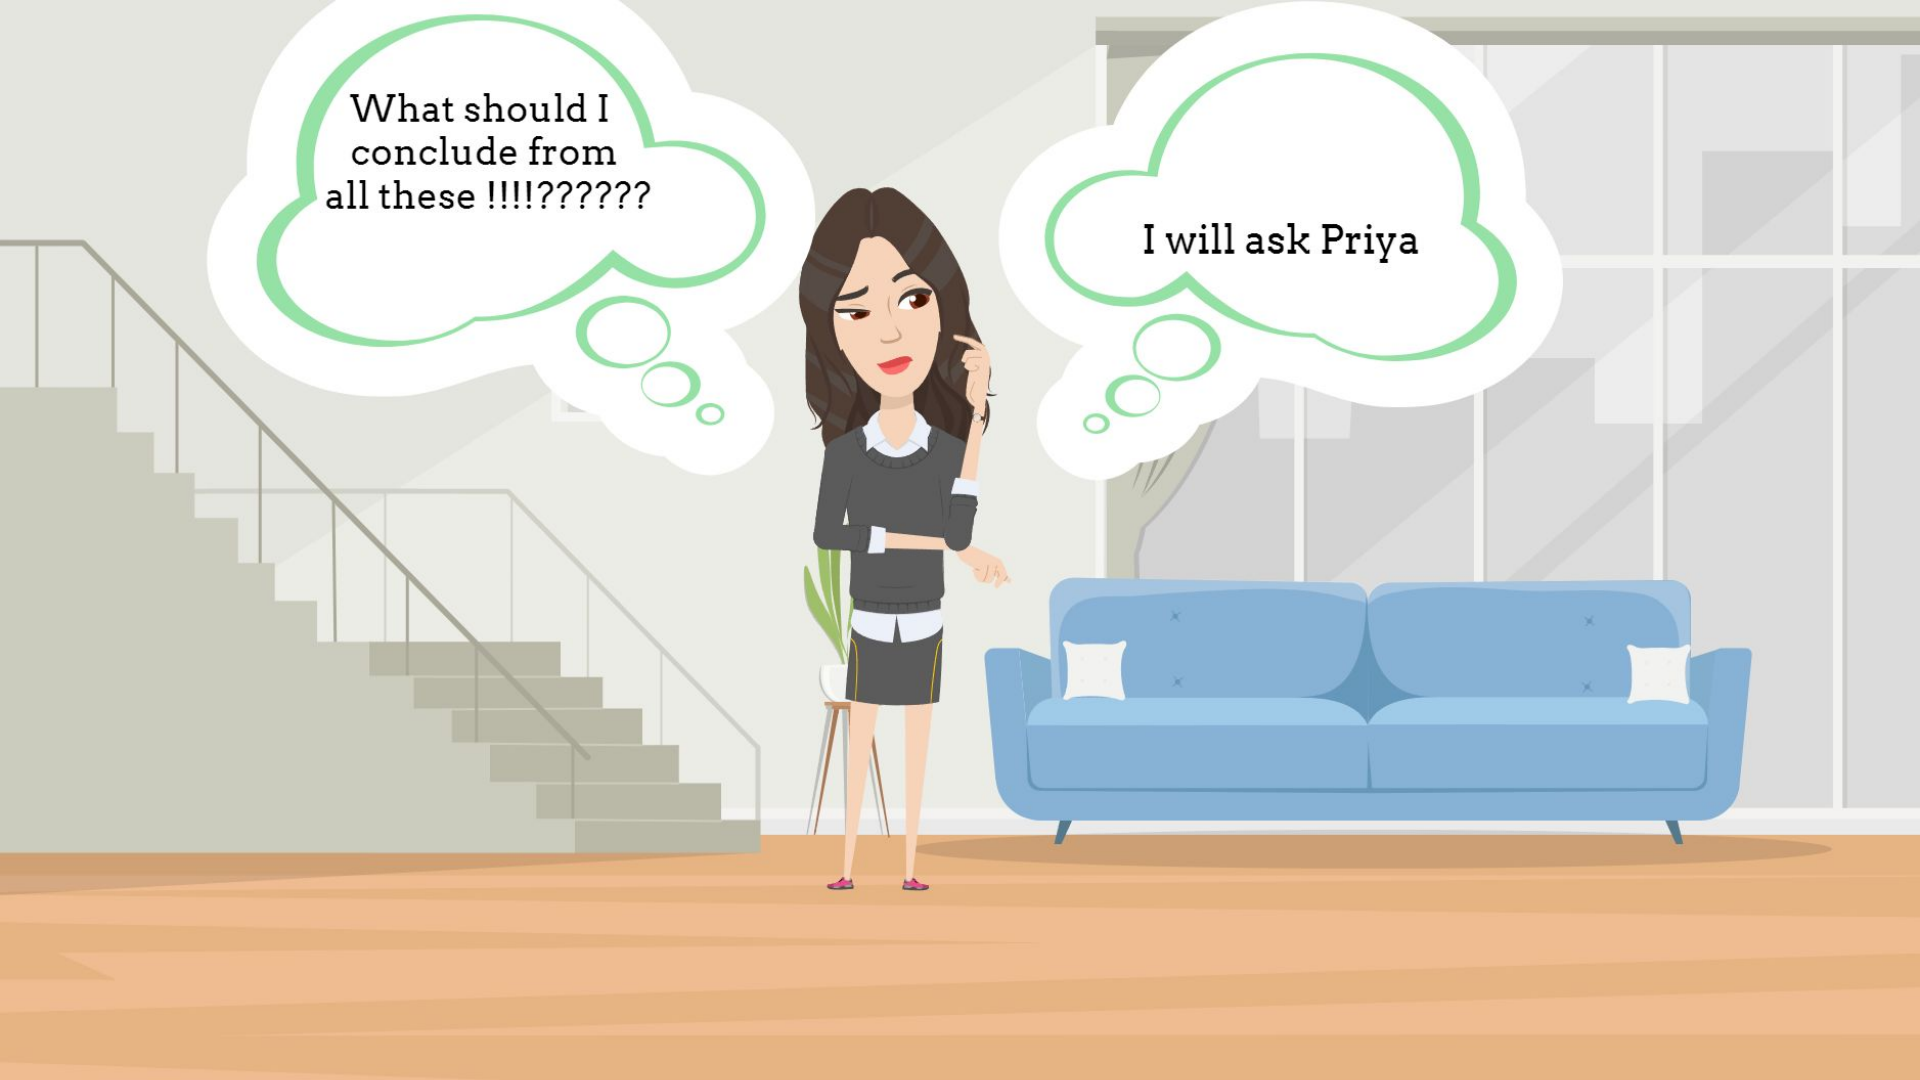

please suggest some courses
for me for the coming term. I
have just finished qualifier

It is upto you

Finish Diploma in Data Science
first and then goto programming

No no, that's not good at all
if you don't have a
programming back ground.

What should I
conclude from
all these !!!!???????

The illustration shows a woman with long dark hair, wearing a black sweater over a white collared shirt and a black skirt, standing in a modern office. She is looking thoughtful, with her hand near her chin. To her left is a staircase with a metal railing. To her right is a blue sofa with two white pillows. The background features large windows and a potted plant on a small stand.

I will ask Priya

Priya, How to choose my courses ???!
What all subjects did you take right after
the qualifier

I took 4 courses together,
but I don't think
it will work for you.
Being a working professional
my idea is to finish
the course as soon as possible.
And you don't have
the domain knowledge too.

I don't really know what to suggest. It is upto you!!
But make sure you take the right combinations.
Once I took 2 tough subjects together and I struggled. Choose wisely..

Hey What's up??!!

Registered!???

No Deepak, that is what
we were discussing about.
How do I choose
my courses

Hey Don't worry at all..
There is an app,
Please do use it.
It makes things
really easy

Thank you!!
I will surely
try that.

This is the
login page of
the app
